Experience

Yayasan Abdullah Bin Mas'ud/ Dormitory Supervisor

July 2021 - June 2022, Kisaran, North Sumatra

- Supervised and mentored middle school students and orphans in a dormitory setting, ensuring a supportive and structured environment.

- Facilitated academic and personal development programs tailored to the needs of the students, promoting both educational excellence and personal growth.

- Coordinated and led extracurricular activities, including sports, arts, and religious studies, to foster a well-rounded development.

- Maintained close communication with parents and guardians, providing regular updates on students' progress and addressing any concerns.

- Implemented discipline and behavioral guidelines, ensuring a safe and respectful living environment for all residents.

- Collaborated with other staff members to create and maintain a positive, nurturing atmosphere within the dormitory and orphanage.

IDN Boarding School, Pamijahan Bogor/ IT teacher

31 Juli 2023 - 20 Juni 2024, Bogor Pamijahan

- Designing and developing a curriculum for web programming subjects
- Delivering effective instruction in HTML, CSS, JavaScript, as well as utilizing frameworks such as Laravel, PHP, Tailwind CSS, and Bootstrap.
- Guiding students in web programming projects and providing constructive feedback.
- Collaborating with school staff to ensure integrated use of technology in the teaching-learning process.

Education

IDN Polytechnic / D4

July 2022- Now, BOGOR

Major in Software Engineering department

Achievements

As a dedicated and proactive learner, I have successfully completed multiple training sessions and courses to enhance my skills and knowledge in various domains. I have participated in a Flutter training program at Idn.id Jakarta and completed several courses related to web development on platforms such as Dicoding, SoloLearn, Skilvul, and Harisenin.

Skill

As a skilled developer, I am proficient in both web development and mobile application development using Flutter. My technical expertise includes:

- HTML: Strong knowledge of creating structured and semantic

web content.

- CSS: Proficient in designing responsive and visually appealing web pages.
- JavaScript: Skilled in adding interactivity and dynamic functionalities to websites.
- Tailwind CSS: Experienced in using utility-first CSS framework for rapid UI development.
- Bootstrap: Capable of leveraging the responsive design framework to create mobile-first websites.
- PHP: Competent in server-side scripting and web application development.
- Laravel: Proficient in building robust and scalable web applications using the Laravel PHP framework.
- Flutter: Knowledgeable in creating cross-platform mobile applications with a single codebase.
